MOODBOARD 2024-Dystopian Elégance by Krebs Glas Lauscha

In a dystopian Christmas season, characterized by uncertainty and gloomy shadows, a special form of beauty emerges: "dystopian elegance". Buildings, clothing and art reflect an atmosphere in which beauty is found in imperfection and in the contrast between decay and grace.

This elegance is seen as a rebellion against the inevitable and a reminder that even in the darkest of times, a spark of creative splendor and individual expression remains alive.

This Christmas celebrates a unique and resilient beauty despite uncertainties and shadows.
